Index to InTech, Vol 31, 1984

PUBLISHED ARTICLES

Article list	Month/Page
Intrinsic Safety: Barriers to Barriers	1/7
Integrated Production and Data Processing Systems: Overcoming the Organizational Barriers	1/27
Portable Data Terminals: Aiding Operators in the Field	1/35
Does Conservative Design Ensure Easy Installation and Maintenance?	1/39
Emergency Shutdown Systems: Proving the Protectors	1/45
Evaluating Personal Computers for Process Control	1/49
Engineering Enrollments Edge Up While Growth in Engineer Demand Slows: Overall Stability Projected	1/79
pHerreting InpHormation pHrom pHickle pHluids	2/7
Securing the Future: Can It Be Done in the Boardroom?	2/25
Turbidity Instrumentation: Clearing Muddy Waters	2/31
Programmable Controllers: More Than Microcomputer Also-Rans	2/39
Improving Analyzer Availability and Accuracy Using Digital Filtering	2/43
1984 R&D Funding Projected at $94.2 Billion	2/67
Ultrasonic Instrumentation: An Ear on Your Process	3/9
Fiber Optics: Shining Light for the 80's	3/25
Remote Fiber Fluorimetry: Using Optics for On-Stream Analysis	3/33
Holography: From Fun to Profit	3/39
Comparing Costs of Fiber and Wire Local Data Networks	3/43
Distributed Control: Pipe Dreams to Reality	4/7
Expert Systems: Automating Mediocrity?	4/37
Selecting Peripherals for Process I/O	4/49
Distributed Control in the Process and Power Industries: Similar but Different	4/59
Programmable Controllers: Local Nodes in Batch Process Control Networks	4/63
Distinctions Between Distributed Systems: Less than Meets the Eye	4/65
Optimizing Electricity Source Allocation: A Case History	4/69
Distributed Control and Fast Loops: Are All Systems Created Equal?	4/73
Supply and Demand Control: Applying What Every Economist Knows to Instrument Practice	4/77
Instrumentation/Ireland '84 Set for May 15-17 in Dublin	4/117
On-line Moisture Analyzers: Noncontact Sensing Comes of Age	5/9
Toxic Gas Monitoring: Simple Instruments — Complex Measurements	5/17
Optimization: Cost Savings, Not Pretty Pictures	5/31
Personal Computers: Spending Your Own Money	5/34
Flow Injection Analysis: Potential for Process Composition Measurement	5/51
Multiparameter Trim: It Pays in Combustion Control	5/57
Speech: A Better Way for Machines to Communicate with Operators	5/63
Technical Programming Preparations Underway for ISA/84	5/91
Heat Flux: What Would You Do If You Knew It?	6/9
Forget the Titanic . . . We're Planning Catastrophes of Our Own	6/31
Guide to Selecting Temperature Switches	6/47
Choosing Sensor Assemblies for Temperature Profiling	6/57
Smart Transmitters: Justifying the Costs	6/63
Instrumentation Education: Course Offerings and Degree Options	6/89
Taking the Guesswork Out of Startup	7/9
Microcomputers: Taking Them Personally	7/25
Field Instruments: Precautions for Adverse Environments	7/43
Intelligent Transmitters: New Capabilities for Startup and Maintenance	7/49
Using a Fiber Optic Modem to Communicate with a Remote Operator Console	7/53
Education Department Developing List of Institutions Offering Instrumentation Education	7/75
Hazardous Area Installation: Recent Patent Activity	8/9
Automated R&D Documentation: Mechanisms May Be Already in Place	8/31
Multipen and Multipoint Recorders: Making the Technology Work for You	8/39
Alarm Systems: Accommodating Digital Control Environments	8/51
Human/Process Interfaces: Making Them Easy to Use	8/55
ISA/84: Strengthening the Foundations of Instrumentation	9/9
Controls for the Year 2000: Most are in the Laboratory Today	9/45
Is a New Language Needed for Project Management?	9/46
Obtaining Baseline Data for Boiler Optimization	9/61
Centralized vs Geographically Distributed Microprocessor-Based Control and Data Acquisition: A Cost Comparison	9/65
pH Control: A Magical Mystery Tour	9/69
Soviet Process Control: What the Russials Tell Each Other	9/79
Minicomputers: Better than Micros for Some Retrofits	9/87
Process Liquid Chromatography: Proving Its Worth	9/91
Optical Image Correlation: A Sensing Technology for Object Identification and Location	9/93
A New Lease on Unit Life: Interfacing Microprocessor Controls to an Existing Plant	9/99
Optimal Control for Industrial Plants: Has Its Time Come?	9/103
Instrumentation '84: Progress, but no Complacency	9/239
Industry Overview: An Interview with Thomas J Feehan	9/305
Flow Measurement: A State of Flux	10/9
On A Clear Day, You Can See The Patent Office: An Inventor's View	10/33
Guide to Selecting Pressure Regulators	10/51
Flowmeter Selection: Broadening — but Still a Challenge	10/65
Boiler Oxygen Trim: Why It Usually Doesn't Work	10/71
Process Oxygen Analysis: More Than Just Picking an Instrument	10/73
Fiber Optics Solves a Pilot Plant Communication Problem	10/79
Batch Process Control: Out from under the Rug	11/9
PCs: The Next Generation	11/31
Batch Process Interfaces: Static Tools for Dynamic Jobs	11/39
Modern Control: Why Don't We Use It?	11/47
American Instruments Abroad: Opportunities for Trade	11/51
Year in Review: A Report by 1983-84 ISA President Max J Kopp	11/93
ISA and Education: An Interview with Baxter Williams	11/96
Cavitation: When Will the Bubble Burst?	12/9
A MAP for the Road to Standardization	12/26
Economic Recovery: Has the Boom "Busted"?	12/28
OEMs and End Users: Who Buys What from Whom?	12/38
Having A Ball With Butterfly Valves — or — Are Rotary Valves Changing Our Lives?	12/45
Preventative Valve Maintenance through Retrofit: Some Case Histories	12/59
Parallel Valves Reduce Erosion in Boiler Feedwater Control	12/63
